Bestech Medical Suppliers

Quality Care Committed To Excellence

Purpose - To enhance the quality of care through commitment to excellence.
Vision - We aim to be a partner of choice that our clients and partners trust within healthcare.
Mission - It is essential that we focus on quality in everything we do throughout our organization, thus aim to commit to the Company Quality Policy being to: - Comply with ISO 13485 requirements - Comply with customer product quality requirements - Continually improve the effectiveness of the quality management system.

About Company

Bestech Medical Suppliers, a progressive and innovative Distributor of advanced medical devices. Founded in [2021], our company is dedicated to supplying top-quality medical devices to hospitals, clinics, and healthcare providers.

We specialize in a variety of medical equipment such as *Infusion pumps, Syringe Pumps, Respiratory Humidifiers, Ultrasounds, Medical suction devices, Brain Monitors, Monitoring Outpatient Software, Clinical Solution Software, Consumables, Accessories, and Surgical Instruments.* Our products are procured from leading manufacturers in the industry, ensuring that our clients only receive the best quality equipment.

Bestech Medical Suppliers, understand the evolving needs of the healthcare industry and committed to providing comprehensive solutions. We offer a range of services such as installation, training, and technical support. Our team works closely with our clients to determine their needs and recommend the best products for their specific requirements. We pride ourselves on our exceptional customer service. Our dedicated team is available around the clock to provide support and resolve any issues that our clients may face. We prioritize our clients' satisfaction and strive to build long-term relationships based on trust and reliability. Bestech Medical Suppliers is focused on addressing the needs of the healthcare industry and providing solutions that improve patient outcomes. Our goal is to offer the best quality products and services to our clients, backed by our commitment to exceptional customer service and support.

Our Promise at ***Bestech Medical Suppliers is*** *To enhance the quality of care through commitment to excellence. We aim to be a partner of choice that our clients and partners trust within healthcare.*

history records and drug library, Waterproof level IP34, Up to 11 hours battery life, Inter-lockable and free combination between syringe pump and infusion pump.
Infusion Pumps, 4.3〃 color touch LCD display with text and image, ±5% high accuracy to make sure safe infusion, 8 infusion modes to satisfy different infusion requirements, Double pressure sensor and double air bubble sensor reassure infusion safety, Programmable and support change rate during infusion, Big history records and drug library storage, Open system and close system optional, Automatic and manual bolus, DERS (Drug error reduction system), DPS (Dynamic pressure system), Waterproof level IP34, Up to 9 hours battery life, Inter-lockable and free combination between syringe pump and infusion pump.

ND-8S EEG MONITOR

Using the aEEG(amplitude-integrated EEG)+EEG(original EEG) to integrate the Masimo blood oxygen monitoring and video monitoring functions. Help the clinicians understand the brain health of children in time, provide a diagnosis basis for children with brain injury.

"Early diagnosis and early treatment, dedicated to the "stationary" solutions for brain function diagnosis and treatment."

"ND-8S EEG monitor Using the aEEG (amplitude-integrated EEG) + EEG (original EEG) to integrate the blood oxygen monitoring and video monitoring functions. Help the clinicians understand the brain health of children in time, provide a diagnosis basis for children with brain injury to receive early intervention, and reduce or avoid secondary brain injury. CLINICAL APPLICATION OF BRAIN FUNCTION MONITORING SCREENING Screening neonates at risk of neonatal hypoxic ischemic encephalopathy (HIE), septicemia of preterm infants (SIE), asphyxia, epilepsy, convulsions, intracranial hemorrhage and..."

"Epilepsy rapid identification and application aEEG background activity pattern identification and classification According to the amplitude and continuity of the upper/lower boundary of aEEG, the neonatal EEG activity will be classified, and the Hellstrom-

Westas background five-classification method will be used to improve the ability of medical staff to identify the aEEG waveforms. Envelope trend chart (ENVELOPE) is used to represent the change in the EEG amplitude, which can better eliminate the artifacts caused by interference and identify epileptic seizure events more accurately. HIE..."

"TECHNOLOGICAL UPGRADING TO HELP THE CLINICIANS QUICKLY AND ACCURATELY INTERPRET Medical all-in-one machine - "intuitive display in the multi-trend chart" Signal amplifier - "multi-channel signal acquisition" High-definition night-vision video monitoring The medical all-in-one machine that complies with the EU CE-related: EN60601-1-2: 2015 and EN60601-1: 2006 standards is used, with better hardware security, stability, durability and anti-interference, and the product industrial design is more in line with clinical Medical scene. Standard 4 channels and optional 8/12 channels, with impedance..."

" Endless love To Guard The New Life Safe Stable integrated medical trolley Compliant with the allowable load in IEC60601-1, more stable than ordinary trolleys, easy to move, and special for bedside monitoring. The ergonomically integrated compact design is convenient for clinical operation by medical staff. Equipped with power socket to provide a power supply solution for the equipment used in conjunction (e.g. Neonate Hypothermia Device)."

FLOW SENSOR

Flow Sensor is the centrepiece of Ventilator device which provides with precise tide volume, flow and pressure of patient's lung condition for professional's evaluation.

Part Number

- PO-85738 Flow Sensor for Hamilton Ventilator (3.3m)
- PO-85739 Flow Sensor for Hamilton Ventilator (1.8m)

Features

C: 60 805 3356
T: 010 634 2083

- Roundish structure of pressure-flow location to assure the proximal flow measurement.
- Tested with Hamilton-G5 Flow Sensor Calibration, Tightness P/V tool <150ml.
- Sensor Connector: 22M/15F, 15M in accordance with ISO-5356-1.
- Single patient use to reduce risk of Ventilator Associated Pneumonia.
- Applicable for Adult and Pediatric.

Specifications
Compatible with breathing circuit in use of Hamilton intensive care Ventilators, Hamilton-G5, GALILEO, Hamilton-C2, RAPHAEL, AMADEUS, VEOLAR device.

SUCTION MACHINES

Top-class surgical suction devices

Critical operations in particular place extremely high demands on the concentration of the surgical team and on the reliability of the products in the operating room. All distracting noise must be avoided so that the team can focus on what is most important. In addition, sensitive tissues need to be handled with utmost care. In such situations, it is essential that the team is able to control the vacuum. The intelligent surgical suction device offers a number of impressive features: an automatic standby mode, a tissue protection function, an intermittent suction function, and many safety functions.

RESPIRATORY HUMIDIFIER MACHINES

NeoHiF i7 Respiratory Humidifier Description:
NeoHiF Series provide effective respiratory treatment for patients by high flow & exact humidification with a warm Air-O2 mixture.
Offering accurate oxygen concentration, which rapidly improves patient's oxygen level, remains the normal operation of airway
mucociliary hair.

Higher flow range

- Wider dew-point temperature regulation
- The flowrate output is as high as 80L/min, which effectively washes the dead space of the nasopharynx to avoid the patient
- inhaling the unhumidified air, ensuring the treatment efficacy
- The lowest adjustable starting temperature can be set from 29℃ to 37℃, which suits more patients with heat intolerance.

Unique intelligent voice alarm

- Configurable voice alarm/operation prompt makes it more
- Convenient for home use patients.

Oxygen sensor

- Non consumable oxygen sensor avoids repeated replacement, thus effectively reduces the cost of use.

SpO2 module (optional)

- It can be widely used in Accurately monitors blood oxygen saturation and pulse rate offering real-time monitoring of therapy.

Nurse call

- Professional nurse call is to meet the needs of centralized management of alarms for medical institutions.

PM2.5 filter

- Effectively avoids dust pollution, prevents respiratory and pulmonary infection, guarantees health protection for patients.

What's included in NeoHiF i7 Respiratory Humidifier:

- NeoHiF-i7 Device
- Medical trolley
- Tube and breathing circuit

Warranty: 2 years
Technical support available

Color Doppler Ultrasound Diagnostic System

HD58

Color Doppler Ultrasound Diagnostic System

HD42

Color Doppler Ultrasound Diagnostic System

Our **HD60** ultrasound solutions achieve higher standards of imaging algorithms, delivering a more accurate original sound based on a GPU parallel architecture. It processes vast levels of acoustic data simultaneously, while also providing users with a more precise and higher quality image. Features Faster Speed, Excellent Imaging Quality, Equipped with AI Technology, Comprehensive Application Packages.

Our **HD42** ultrasound solutions achieve higher standards of imaging algorithms, delivering a more accurate original sound based on a GPU parallel architecture. It processes vast levels of acoustic data simultaneously, while also providing users with a more precise and higher quality image.

As the flagship model of this series, **HD62** provides a sound configuration in the field of obstetrics and gynecology, escorting the inspection of pregnant women.

Based on customer requirements, **HD58** is designed to deliver high efficiency with precision imaging, which is empowered by Himage, GPU parallel architecture technology, HiPure, advanced speckle noise suppression technology and HiScome, spatial composite imaging technology.
